

Board of Directors  
Santa Clara Valley Water District  
5750 Almaden Expressway  
San Jose, CA 95118-3686

Dear Santa Clara Valley Water District Board:

I support the Santa Clara Valley Water District's Countywide water reuse program, which invests in advanced purified water projects to create a new sustainable and reliable water supply for our community and environment.

I had the opportunity to visit the Silicon Valley Advanced Water Purification Center, where I learned about the state-of-the-art, multi-stage advanced technologies that produce highly purified water that can be used for a variety of purposes, including expanding Silicon Valley's future drinking water supplies.

The Countywide water reuse program is a smart long-term solution for addressing the county's water needs while also providing region-wide benefits. By providing a drought-proof water supply, the program will give us more local control over our water supply and make the county less vulnerable to the rising costs of imported water.

Thank you for continuing to pursue this viable new water supply for Santa Clara County. Please add my name to the list of agencies, organizations and individuals who support this critical program that ensures the reliability of our water supply, economy, and the health and safety of our citizens through proactive water resource planning.

Sincerely,
